Computers and Geotechnics **10** (1990) 341–342

CONTENTS OF VOLUME 10

Number 1

A General Procedure to Correct Sampling Bias on Joint Orientation Using a Vector Approach 1
D. N. WATHUGALA, P. H. S. W. KULATILAKE, G. W. WATHUGALA (USA) & O. STEPHANSSON (Sweden)

Time Step Selection for 6-Noded Non-linear Joint Element in Elasto-Viscoplasticity Analyses 33
K. SEKIGUCHI (Japan), R. K. ROWE, K. Y. LO & T. OGAWA (Canada)

Three Dimensional Finite Element Model of Laterally Loaded Piles . . . 59
D. A. BROWN & C.-F. SHIE (USA)

Benchmarks: Validation, Reliability and Quality Assurance of Geotechnical Finite Element Software. 81

Calendar of Events 85

Number 2

Finite Element Modelling of the Three-Dimensional Ground Deformations Due to Tunnelling in Soft Cohesive Soils: Part 1—Method of Analysis . . . 87
K. M. LEE & R. K. ROWE (Canada)

Finite Element Modelling of the Three-Dimensional Ground Deformations Due to Tunnelling in Soft Cohesive Soils: Part 2—Results 111
K. M. LEE & R. K. ROWE (Canada)

Technical Notes

A Benchmark for Soil–Structure Interface Elements 139
C. C. HIRD & D. RUSSELL (UK)

A Method for Analysis of Axially Loaded Piles in Nonlinear Soils . . . 149
H. H. VAZIRI & J. XIE (Canada)

Calendar of Events 161

Computers and Geotechnics **10** (1990)—© 1991 Elsevier Science Publishers Ltd, England. Printed in Great Britain

Number 3

A Comprehensive Review of Strain Localization in Elastoplastic Soils . . 163
J. P. BARDET (USA)

Monitoring of Dynamic Compaction by Deceleration Measurements . . . 189
Y. K. CHOW, D. M. YONG, K. Y. YONG & S. L. LEE (Singapore)

Numerical Experiments into Group Effects on the Response of Piles to Lateral Loading 211
D. A. BROWN & C.-F. SHIE (USA)

Technical Notes

Foundation Shakedown of Offshore Platforms 231
A. K. HALDAR (Canada), D. V. REDDY & M. AROCKIASAMY (USA)

Saturated–Unsaturated Analysis of Water Flow in Slopes of Rio de Janeiro, Brazil 247
E. A. VARGAS JR, R. C. VELLOSO, T. M. P. DE CAMPOS &
L. M. COSTA FILHO (Brazil)

Calendar of Events 263

Number 4

A Continuum Method of Pile Driving Analysis: Comparison with the Wave Equation Method. 265
B. NATH (UK)

Calculation of Cyclic Response of Laterally Loaded Piles 287
A. J. GRASHUIS, H. A. DIETERMAN (The Netherlands) &
N. F. ZORN (FRG)

Technical Notes

Consolidation Behaviour of Finely Laminated Clays 307
M. M. ABID & I. C. PYRAH (UK)

Assessment of Basal Stability for Braced Excavation Systems Using the Finite Element Method 325
A. T. C. GOH (Australia)

Calendar of Events 339
